

# Joining Bitwarden as a New User

## Joining

In order to join Bitwarden, you should first receive an invite email.

Once you click **Join Organization Now**, you will want to click **Create Account**.

## Join Organization

Matchfire

**you@example.com**

You've been invited to join the organization listed above. To accept the invitation, you need to log in or create a new Bitwarden account.

Log In

Create Account

© 2019, 8bit Solutions LLC  
Version 2.10.1

Fill out your info on this page, select a password that is both secure and memorable. **Do not use any generic password the company has used in the past.** If you lose the password your account will need to be deleted and re-added.

Once you have created your account, you can Slack Miranda, Nance, Sally, or Cameron in order to get your account activated.

Once your account is activated you should see **Collections** on the Bitwarden homepage. Any passwords you are able to access will be here and you should add new passwords inside of these Collections.

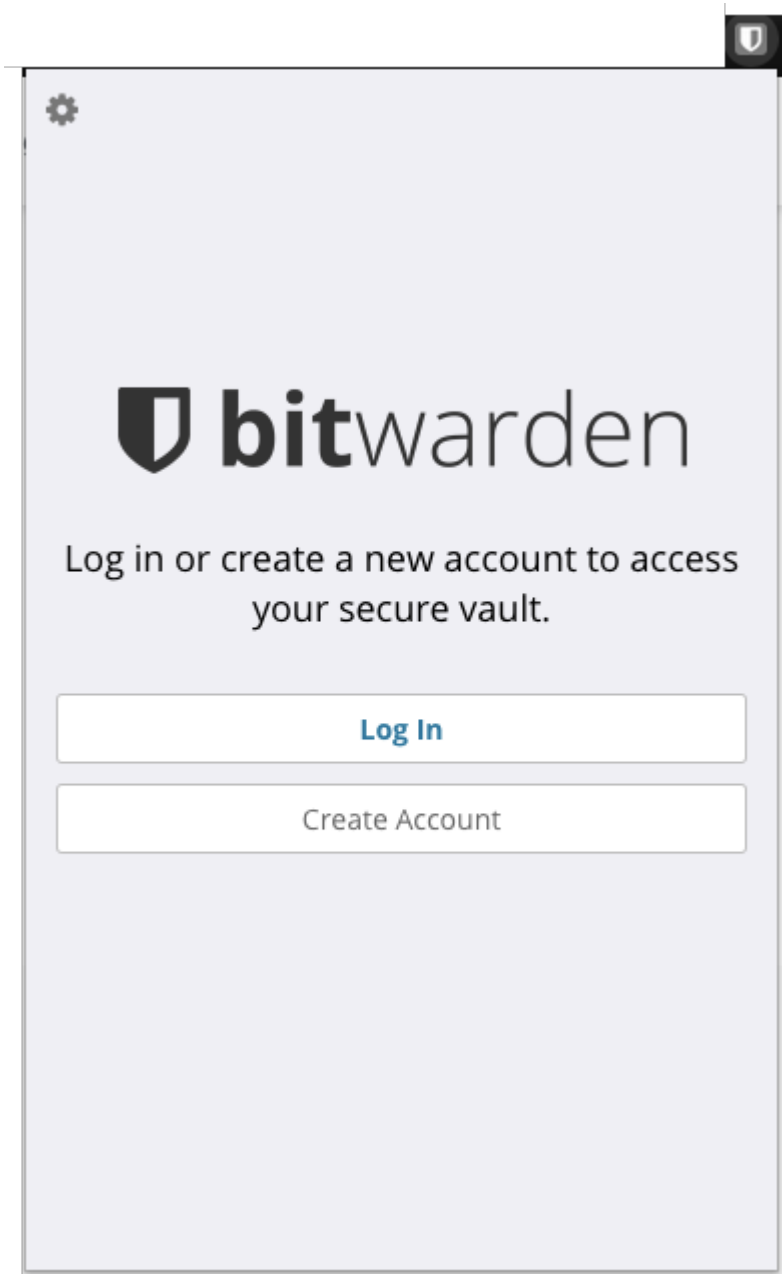

## Password Auto-fill

Now that you have joined, it is a good idea to get the Browser Extension so you can have passwords fill out automatically for you.

You can click your browser icon below to get the Extension for it.

Once you have it installed, click the Bitwarden Icon in your browser to bring up the following screen

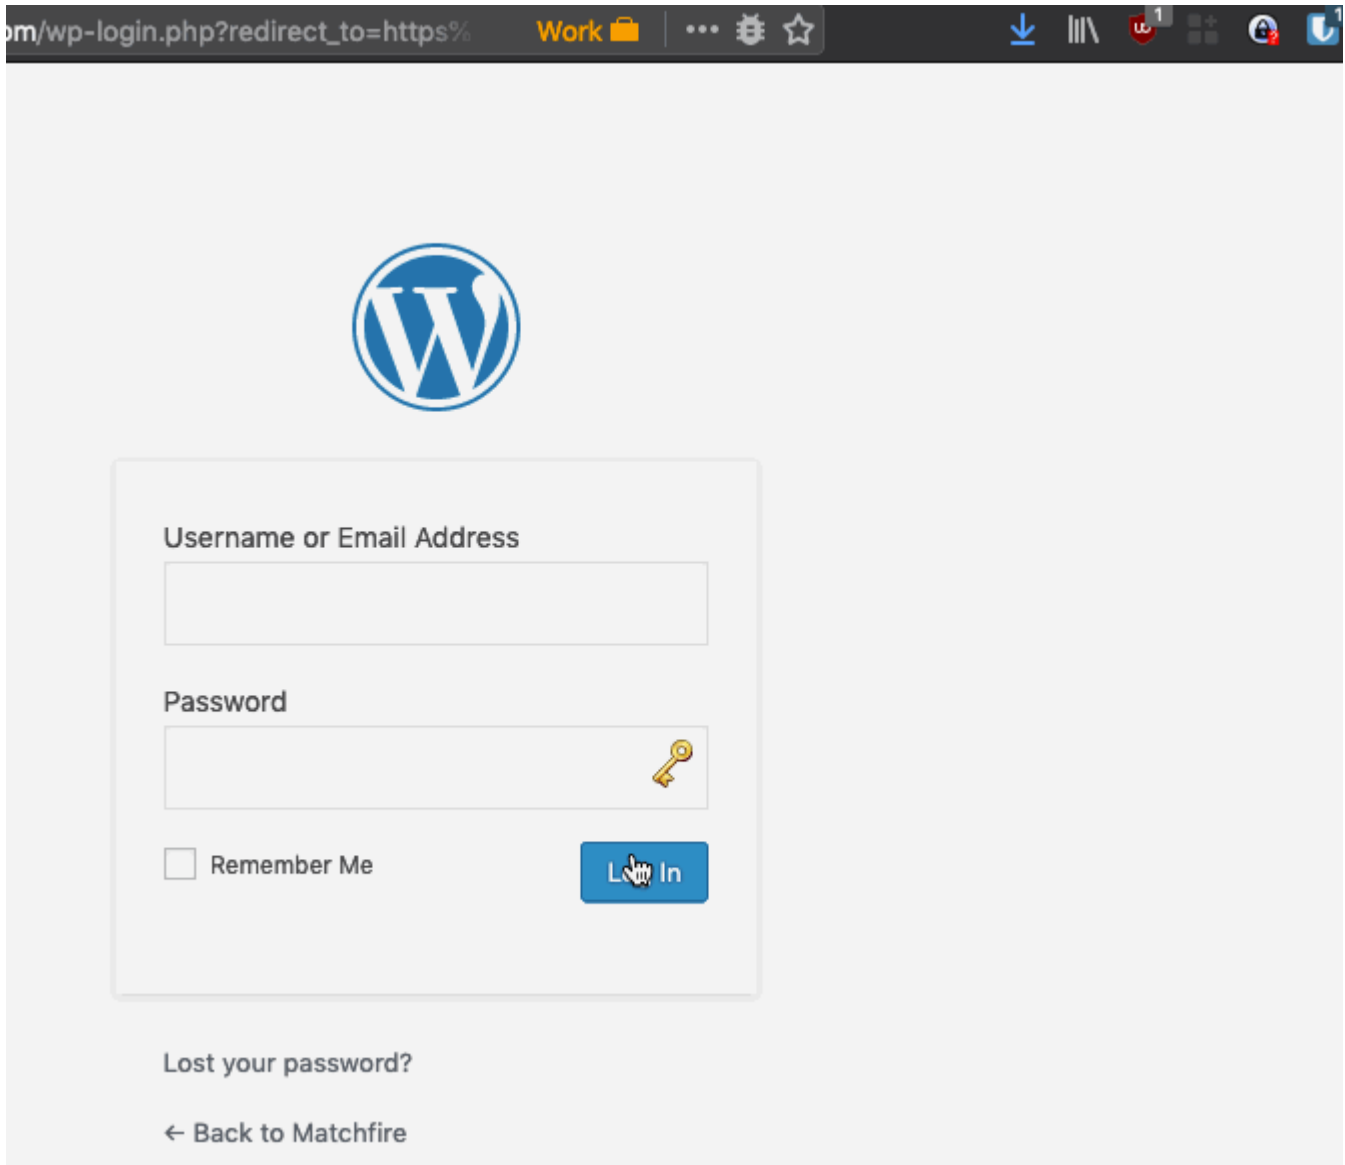

Click the **Gear Icon** at the top left to bring up the settings. Set the **Server URL** to <https://bitwarden.matchfire.com> and click **Save**.

Close	Bitwarden	Save
SELF-HOSTED ENVIRONMENT		
Server URL		
<a href="https://bitwarden.matchfire.com">https://bitwarden.matchfire.com</a>		
Specify the base URL of your on-premise hosted Bitwarden installation.		
CUSTOM ENVIRONMENT		
Web Vault Server URL		
API Server URL		
Identity Server URL		
Notifications Server URL		
Icons Server URL		
For advanced users. You can specify the base URL of each service independently.		

You can now log into Bitwarden with your email and the password you created earlier.

When you are on a page that you have access to a login for, you will see a number by the Bitwarden icon and can click the extension to autofill.

## (Optional) Remember My Password and/or Using a PIN to unlock instead of your password

Once logged in with the extension, you can click **Settings** at the bottom and adjust the Lock Options as well as set Unlock with PIN.

You can set Lock Options to **Never** if you don't want to have to type your password again for the extension.

You can also set a PIN by checking the **Unlock with PIN** box, you can uncheck "Lock with master password on browser restart" if you want to only use the PIN for the browser.
